
Feedback Collection Tools

Google forms

1. About the tool

Google Forms is a free online tool that allows users to create surveys, quizzes, and forms for data collection. Its main purpose is to help users gather information, conduct surveys, or create quizzes with ease. Google Forms helps users by offering a simple interface to collect responses and analyze data automatically through Google Sheets.

2. How Can You Use It?

Users can create surveys, quizzes, and feedback forms, share them with respondents, and collect responses in real-time. It also integrates seamlessly with Google Sheets for easy data analysis and supports features like conditional logic, file uploads, and response validation.

3. Conditions of use / Limitations

Google Forms is entirely free to use with a Google account. Google Forms has a basic interface and lacks advanced design customization options. Complex survey logic and highly interactive features are also limited. Google Forms is web-based and accessible via any browser on desktop and mobile devices.
